(54) Title: AMBIENT LIGHT SENSOR

(57) Abstract: A light-emitting display having display areas (14), which may be lit or unlit, comprising a sensor (13) for ambient light, in which the display is arranged to use an output of the sensor (13) to modify the brightness of the display areas (14) when lit in dependence upon the ambient light conditions, the sensor being hidden behind an unlightable section of the display. The display is particularly advantageously an electroluminescent display.
